ETERNITY

In both eastern countries and western ones, circles are compared to the God, while squares are compared to the land. The two supreme figures are symbols for strength and thinness, which freely fit together to form the colorful world. Their perfect shapes show a permanent beauty breaking through space: squares confront circles, and squares blend circles.

VISUAL SENSE

The pursuit of top quality and visual experience, simple and plump lines, beautiful and detailed outline of life's simple classic bears the traces of Jishi Pu's. From one story to another story that can touch the timeless classics, and can not speak, can not be described, can not be determined, only a little reflection, the kind of aesthetic classic, noble and extraordinary.
